REVIEW COMMENTS:

The scope of the research is suitable for the journal. However, the manuscript needs some revisions to make it an acceptable submission as follows:

1. Abstract should contain only the sentences about the aim, method, participants, data collection, data analysis and results briefly.
2. There should be some more citations from international studies in the introduction part.
3. In the last paragraph of the Introduction section, before the Method part there should be research questions presented.
4. Method part should be designed as follows:
5. Method

2.1. Research design

2.2. Participants

2.3. Data collection tools

2.4. Data analysis

1. Results part should be revised, and presented connecting the research questions with more explanations.
2. Discussion part should be created with findings and cited works in the Introduction part.
3. Conclusion should be expanded.
4. References should be revised in accordance with the APA format adding up some more international references used in the text body.
