Dear Dr Arung:

Thank you for reviewing manuscript ID FO-ART-08-2014-000711 entitled "Safety and anti-ulcerogenic activity of a novel polyphenol-rich extract of clove buds (*Syzygium aromaticum* L)" for Food & Function.

Your support and advice is very much appreciated and we hope that we may call upon you again to review future manuscripts.

Also, did you know that you can update your research interests to make sure that you only get sent papers that match your interests?

You can do this by going to the Food & Function page (<http://mc.manuscriptcentral.com/food>), clicking on your name at the top of the screen and then selecting 'User ID & Password' from the list. This page contains a 'Research Interests' box near the foot of the page - please check that this is accurate.

This information helps us to make sure that you are only asked to review the most appropriate papers for your areas of expertise.

Yours sincerely,
 Professor Steven Feng Chen
 Associate Editor, Food & Function
