Comments

Yes

10. Please indicate the revision should be made or the reviewer could directly give comments in the document.

Hasil Review.

Penelitian yg dilakukan peneliti menarik, dengan mengambil isi yang sedang terjadi.

Pada pendahuluan terdapat tujuan untuk membuat pemodelan matematika penyebaran COVID19 dengan mempertimbangkan faktor vaksinasi sebagai upaya penanggulangan penyebaran COVID19. Hal ini mungkin dapat lebih diperjelas, vaksinasi hanya sebagai variabel saja.

Selain itu, penelitian ini merupakan literatur review, maka perlu literatur yang banyak untuk menunjang penelitian ini. Untuk itu, perlu penambahan literatur dan penjelasan pada metode sebaiknya ditambahkan dan diperjelas.

Dengan menambahkan flow chart pada metode akan memudahkan dalam penjelasan yang runut dan rinci.

Secara keseluruhan tulisan ini bagus, dengan sedikit penambahan akan lebih baik.
