Note	From
Dear Editor-in-Chief Lily Maysari Angraini, We are pleased to submit our revised manuscript, titled Refining the Formulation of Geometric Optics as an Abelian U(1) Gauge Theory: Addressing Conceptual Inaccuracies and Enhancing Predictive Accuracy, for consideration in the Indonesian Physical Review. In response to the valuable feedback provided during the initial review, this version focuses exclusively on the theoretical aspects of the topic, offering a constructive critique and refined insights into the Abelian U(1) gauge theory formulation in geometric optics. We believe that this revision aligns with the journal's objectives of fostering scholarly discourse and advancing the understanding of foundational physics. We thank the editorial team for their insightful feedback, which has greatly contributed to improving the quality and focus of our work. We look forward to your evaluation and are happy to provide any additional information or clarification as needed during the review process. Thank you for considering our submission. Sincerely, Adrianus Inu Natalisanto On behalf of all authors Universitas Mulawarman and Universitas Jambi adrianus@fmipa.unmul.ac.id adrianus, Adrianus-paper-2025 (OK final)(14 Januari 2025) (rev1).docx adrianus, 2.
